

## DALTON | Boardroom Table

### Specifications

Pill-shaped boardroom table with optional built-in monitors. The 50-mm-thick top (overall, including the finished top and undertop) is composed of central tops in wood veneer spanning the full width of the table, bordered by perimeter tops upholstered in leather. Decorative inserts in liquid-painted stainless steel ensure a clear transition between materials. A lacquered undertop with a 45° chamfer supports the upper structure.

The closed base, with semicircular ends, has straight vertical panels in lacquered finish. A 40-mm metal skirting element runs along the base, aligned flush with the floor. The hidden structural frame is crafted from laser-cut iron and consists of top and bottom plates joined by TURADI's signature interlocking system. It is supported by square metal columns, with all components lacquered in the same color as the undertop.

Cable management trays and device cut-outs can be integrated into the design. Removable base panels secured with clips allow easy maintenance of integrated devices.

The boardroom table is shown with DB3 17.3" by Arthur Holm. Devices not included. Custom dimensions and finishes available upon request.

### Finishes (as shown)

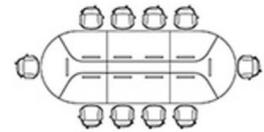

Makassar Ebony veneer

Fondotinta leather

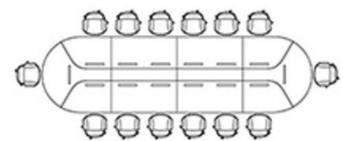

Champagne metal
