

DAYTONA | Boardroom Table

Specifications

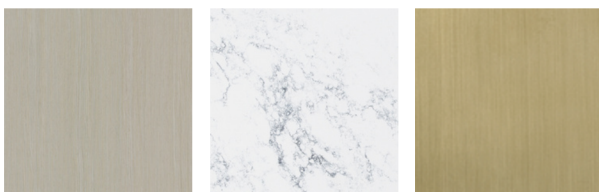

Diamond-shaped boardroom table with optional built-in monitors. The 80-mm-thick top (overall, including the finished top and undertop) is composed of central marble tops spanning the full width of the table, bordered by perimeter tops in wood veneer. Decorative inserts ensure **MONACO Boardroom Table** materials. A lacquered undertop with a 45° chamfer supports the upper structure.

The closed base has a faceted geometric design and inclined vertical panels in lacquered finish. A 70-mm metal skirting element runs along the bottom, aligned flush with the floor. The hidden structural frame is crafted from laser-cut iron and consists of individual metal modules. All the modules are securely fastened to each other and lacquered in the same color as the undertop.

Cable management trays and device cut-outs can be integrated into the design. Removable base panels secured with magnets allow easy maintenance of integrated devices.

The boardroom table is shown with DynamicX2Talk 17.3" by Arthur Holm. Devices not included. Custom dimensions and finishes available upon request.

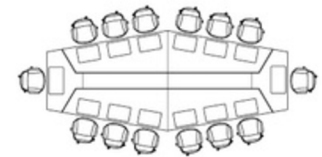

Finishes (as shown)
