

MONACO | Boardroom Table

Specifications

Rectangular boardroom table with optional built-in monitors, defined by rounded corners and a gentle arc along its length. The 50-mm-thick top (overall, including the finished top and undertop) is composed of central tops in wood veneer, bordered by perimeter tops in leather. Decorative inserts in liquid-painted stainless steel ensure a clear transition between materials. A lacquered undertop with a 45° chamfer supports the upper structure.

The closed base, with soft rounded corners, has straight vertical panels upholstered in leather. A 40-mm metal skirting element runs along the bottom, aligned flush with the floor. The hidden structural frame is crafted from laser-cut iron and consists of top and bottom plates joined by TURADI's signature interlocking system. It is supported by square metal columns, with all components lacquered in the same color as the undertop.

Cable management trays and device cut-outs can be integrated into the design. Removable base panels secured with clips allow easy maintenance of integrated devices.

The boardroom table is shown with DynamicX2Talk 17.3" by Arthur Holm. Devices not included. Custom dimensions and finishes available upon request.

Finishes (as shown)

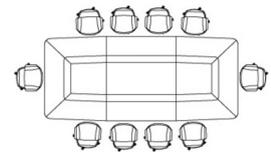

Light Grey Oak veneer

Latte leather

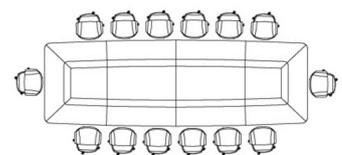

Brass metal

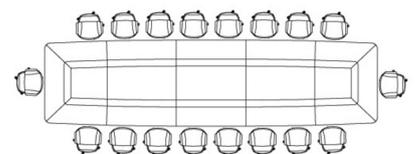

MONACO S - 10 seats

L 500 x D 225 x H 75 cm
