

SOLO | Multimedia Totem

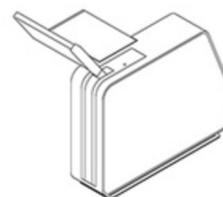

Specifications

A stand-alone compact desk unit that serves as multimedia totem. The outer shell mold is produced in solid poplar wood of European origin, that can accommodate different types of covering materials such as wood veneer, lacquered wood, or leather. The side panels (either or both sides) are removable to access the interior of the totem for easy maintenance and cable management purposes.

Featuring a retractable writing table in wood veneer or lacquered wood. The metal base plate is essential to allow the proper fixation of the totem to the ground. Can accommodate other devices and accessories such as microphones, USB plates, and others.

This multimedia totem is shown with DynamicChairDisplay 15.6" by Arthur Holm. Custom dimensions and finishes available upon request.
