

## CLINO | Boardroom Table

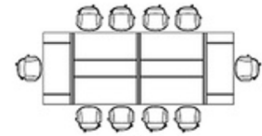

### Specifications

Rectangular boardroom table with optional built-in monitors. The 50-mm-thick top (overall, including the finished top and undertop) is composed of central tops in wood veneer, bordered by perimeter tops upholstered in leather. Decorative inserts in liquid-painted stainless steel ensure a clear transition between materials. A lacquered undertop with a 45° chamfer supports the upper structure.

The closed base has straight corners and inclined vertical panels in lacquered finish. A 60-mm metal skirting element with an L-shaped profile runs along the bottom, aligned flush with the floor. The hidden structural frame is crafted from laser-cut iron and consists of individual metal modules. All the modules are securely fastened to each other and lacquered in the same color as the undertop.

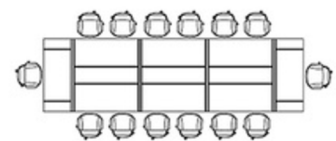

Cable management trays and device cut-outs can be integrated into the design. Removable base panels secured with magnets allow easy maintenance of integrated devices.

*The boardroom table is shown with DynamicX2Talk 17.3" by Arthur Holm. Devices not included. Custom dimensions and finishes available upon request.*

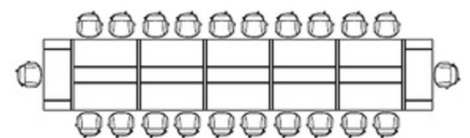

**CLINO S - 10 seats**

L 530 x D 200 x H 75 cm
