

COUTURE | Boardroom Table

Specifications

Barrel-shaped boardroom table with optional built-in monitors. The 50-mm-thick top (overall, including the finished top and undertop) is composed of a skeletal frame with edges and central tops in wood veneer. Decorative inserts in liquid-painted stainless steel follow along the contour, while the perimeter and terminal areas feature leather inlays, set into the surface and secured with concealed magnets. A lacquered undertop with a reverse demi-bullnose edge profile supports the upper structure.

The closed base, with soft rounded corners, has straight vertical panels in lacquered finish. The hidden structural frame is crafted from laser-cut iron and consists of top and bottom plates joined by TURADI's signature interlocking system. It is supported by square metal columns, with all components lacquered in the same color as the undertop.

Cable management trays and device cut-outs can be integrated into the design. Removable base panels secured with clips allow easy maintenance of integrated devices.

The boardroom table is shown with DB2 22" by Arthur Holm. Devices not included. Custom dimensions and finishes available upon request.

Finishes (as shown)

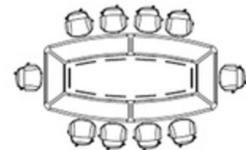

Walnut Planked veneer

Latte leather

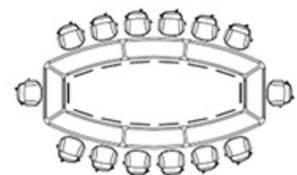

Champagne metal

COUTURE S - 10 seats
